

**Solve each problem.****Answers**

- 1) There were fifteen friends playing a video game online when nine players quit. If each player left had two lives, how many lives did they have total?
- 2) Lana baked two brownies, but needed five total for her party. If she used six spoonfuls of flour on each one, how much cups of flour does she still need?
- 3) Mike bought sixteen boxes of chocolate candy and gave eight to his little brother. If each box has five pieces inside it, how many pieces did Mike still have?
- 4) In a video game, each enemy defeated gives you nine points. If a level has thirteen enemies total and you destroy all but four of them, how many points would you earn?
- 5) A chef needs eight potatoes for a meal. He has already cooked six. If each potato takes nine minutes to cook, how long will it take him to cook the rest?
- 6) Frank had sixteen video games but seven of them weren't working. If he wanted to sell the working games for \$9 each, how much money could he earn?
- 7) A worksheet had two problems on it. If a teacher had twelve worksheets to grade and had already graded six of them, how many more problems does she have to grade?
- 8) April's discount flowers was having a sale where each rose was seven dollars. If April started with eight roses and had two roses left, how much money did she earn?
- 9) A painter needed to paint thirteen rooms in a building. Each room takes six hours to paint. If he already painted seven rooms, how much longer will he take to paint the rest?
- 10) At lunch a waiter had eleven customers and three of them didn't leave a tip. If he got \$4 each from the ones who did tip, how much money did he earn?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
