## Use each diagram to solve the problems.

1) If you were to select 1 shape at random from the array, what is the probability it will be a heart?
2) If you were to select 1 shape at random from the array, what shape do you have the greatest probability of selecting?
3) How many shapes are there total in the array?
4) Which shape has a $36.00 \%$ chance ( 9 out of 25 ) of being selected?
5) How many pieces are there total in the spinner?
6) If you spun the spinner 1 time, what is the probability it would land on a white piece?
7) If you spun the spinner 1 time, what is the probability it would land on a gray piece?

8) If you spun the spinner 1 time, what is the probability of landing on either a black piece or a white piece?
9) If you spun the spinner 1 time, what is the probability it would land on a black piece?
10) If you were to roll the dice one time what is the probability it will NOT land on a 1 ?
11) If you were to roll the dice one time what is the probability it will land on a 3 ?
12) If you were to roll the dice one time, what is the probability of it landing on an odd number?
