- 1) Given the numbers 12 and 22, how much would you need to subtract from the larger number to make it even with the smaller number?

Answers

- 2) Given the numbers 37 and 13, how much would you need to add to the smaller number to make it even with the larger number?
- 3) Given the numbers 96 and 29, how much would you need to subtract from the larger number to make it less than the smaller number?
- 4) Given the numbers 94 and 53, how much would you need to subtract from the larger number to make it less than the smaller number?
- 5) Given the numbers 12 and 45, how much would you need to add to the smaller number to make it greater than the larger number?
- 6) Given the numbers 85 and 29, how much would you need to subtract from the larger number to make it even with the smaller number?
- 7) Given the numbers 27 and 89, how much would you need to add to the smaller number to make it even with the larger number?
- 8) Given the numbers 95 and 65, how much would you need to add to the smaller number to make it even with the larger number?

- 9) Given the numbers 54 and 46, how much would you need to add to the smaller number to make it greater than the larger number?

- 10) Given the numbers 61 and 70, how much would you need to subtract from the larger
- number to make it even with the smaller number?
- 11) Given the numbers 9 and 28, how much would you need to add to the smaller number to make it even with the larger number?
- 12) Given the numbers 87 and 30, how much would you need to subtract from the larger number to make it less than the smaller number?
